## Carrier Objective

---

Passionate software developer with expertise in Next.js and React, seeking to leverage my skills in creating dynamic, user-friendly applications to contribute to a forward-thinking tech company.

## Education

---

**JECRC University, Jaipur(Raj.)** 2020 – 2024  
*B.Tech CSE*

**St. Paul's Ser Sec School, Udaipur(Raj.)** 2006 – 2020  
*Senior Secondary education*

## Experience

---

**MERN Stack Intern** Jaipur, Rajasthan  
*Owebest Technologies* May 2024 – Ongoing

- Collaborated with a team of developers to build live projects using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented guest check functionality, enhancing user experience and streamlining the checkout process.
- Worked on microservices architecture, ensuring scalability and efficient communication between services. RESTful APIs to integrate various services and improve application performance.

**Software Developer Intern** Remote (Jaipur)  
*Grras Solutions* Feb 2024 – June 2024

- Successfully completed assigned tasks within project timelines.
- Spearheaded the implementation of modern and intuitive user interfaces using HTML, CSS, JS, React and Redux.
- Created backend API's for user Signup and Authentication.

## Projects

---

### FoodLake

- A Food Delivery website made using MERN Stack, with features including Login/Signup with added layer of security with password encryption using Bcrypt, session management using JWT, add to cart functionality and previous order records.
- Tools Used: Reactjs, Bootstrap, Express, Nodejs, MongoDB

### Todo App

- Built using MERN stack this is a single page application designed to manage a list of tasks.
- Revamped state management efficiency by incorporating Redux toolkit..
- Tools Used: Reactjs, Bootstrap, Express, Nodejs, MongoDB, Redux toolkit

### Youtube Clone

2002

- Clone application of famous video streaming app youtube, with video playback support and fetching data from YoutubeAPI
- Tools Used: React Native, Redux Toolkit, YoutubeAPI

## Technologies

---

**Languages and Database:** JavaScript, Java, Python, SQL, MongoDB

**Technologies:** Reactjs, NextJs, Redux toolkit, Node, Mongoose, Express, NestJs
